Lesson 5.1: SEO & Organic Traffic Mastery

THE TOOL SEO FRAMEWORK

Web tools have unique SEO advantages - they're inherently useful, linkable, and shareable.

KEYWORD RESEARCH FOR TOOLS

High-Intent Keywords

Target keywords that indicate immediate need:

- "[task] calculator"
- "[task] generator free"
- "how to [task] online"
- "[task] tool"
- "[task] converter"
- "free [task] maker"
- "[task] builder online"
- "[task] creator no signup"

KEYWORD RESEARCH PROCESS

```
// Keyword opportunity scoring
const keywordScore = {
  volume: 1000,      // Monthly searches
  difficulty: 35,    // 0-100 scale
  cpc: 2.50,         // Commercial intent indicator

  calculateOpportunity() {
    // Higher volume = better
    const volumeScore = Math.log10(this.volume) * 25;

    // Lower difficulty = better
    const difficultyScore = (100 - this.difficulty) / 2;
```

```
        // Higher CPC = more commercial intent
        const intentScore = Math.min(this.cpc * 10, 25);

        return volumeScore + difficultyScore + intentScore;
    }
};

// Score > 70 = High opportunity
// Score 50-70 = Medium opportunity
// Score < 50 = Low opportunity
```

Lesson 5.2: Viral & Social Growth

Build viral mechanics directly into your tool to create exponential growth.

  conversionRate: 0.2, // % who sign up from invite

  calculate() {
    return this.invitesSent * this.conversionRate;
  }
};

// K > 1 = Viral growth
// K = 1 = Linear growth
